

Impact report 2024

In 2024, you returned **2000 kgs** of pallets for recycling. This is about **194 Pallets** that can continue to enjoy a circular life cycle.

Products ordered

5 000

AION Pallets made of:

80% Recycled Big Bags
Recycled PE/PP plastic from used big bags packaging.

4% Additives
Virgin plastic additives, added to ensure durability and color.

16% Recycled Pallets
Pallets that have been collected and recycled.

Emissions reduced

You have reduced emissions by

7000

 kg CO₂e

This is equal to the emissions from **22.5** trips from London to New York.

Compared to the use of similar products made of virgin plastic. Check out our website [How do we calculate emissions](#) to learn more about these numbers.

Circular material journey

The pallets are made of big bags used in the Norwegian fishing industry, recycled in the Netherlands and produced in Denmark. When broken they are re-made into new pallets.
